

PLOTWEAVER L^AT_EX DOCUMENT CLASS

Documentation for the Plotweaver L^AT_EX document class. See `example.tex` and `character-sheet.tex` for sample usage.

ICON COMMANDS

These commands produce commonly used icons and are provided by `plotweaver-icons.sty`. All of the icons are implemented using TikZ. The icons created by `\action`, `\doubleAction`, `\tripleAction`, `\freeAction`, `\reaction`, `\forever`, and `\key` will match the current text color. For example:   . Icons will also respect font size:   .

U: 2026-08-11

`\action` ()

This command produces the  icon.

U: 2026-08-11

`\doubleAction` ()

This command produces the  icon.

U: 2026-08-11

`\tripleAction` ()

This command produces the  icon.

U: 2026-08-11

`\freeAction` ()

This command produces the  icon.

`\reaction` ()

This command produces the  icon.

`\forever` ()

This command produces the  icon.

U: 2026-08-11

`\complication`[*value*] ()

This command produces the  icon. It takes an optional argument for a number, which will be subsequently displayed.

A `\complication` is complicated. Sometimes complications come with values like `\complication[X]`.

A  is complicated. Sometimes complications come with values like X.

U: 2026-08-11

`\complicationDice`[*value*] ()

This command produces the  icon. It takes an optional argument for a number, which will be displayed inside of the icon like so: . It is a little larger than `\complication`.

A `\complicationDice` is complicated. Sometimes complications come with values like `\complicationDice[x]`.

A ✨ is complicated. Sometimes complications come with values like ✨.

`\opportunity`

(✨)

This command produces the ✨ icon.

U: 2026-08-11

`\key`

(★)

This command produces the ★ icon.

FEATURE BOXES

These boxes are implemented using `tcolorbox` and are provided by `plotweaver-boxes.sty`.

U: 2026-08-16

`/tcb/featureBox=<text>`

The `tcolorbox` key containing the styling for feature boxes. See the `tcolorbox` documentation for more information.

```
\begin{tcolorbox}[featureBox, 2
  {title={Feature Box}}
  \lipsum[1][1-3]
\end{tcolorbox}
```

FEATURE BOX

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris.

U: 2026-08-16

`/tcb/leftBox=<text>`

The `tcolorbox` key containing the styling for left boxes. See the `tcolorbox` documentation for more information.

```
\begin{tcolorbox}[leftBox, title={Left 2
  {Box}}
  \lipsum[1][1]
\end{tcolorbox}
```

LEFT BOX

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

U: 2026-08-16

`/tcb/rightBox=<text>`

The `tcolorbox` key containing the styling for right boxes. See the `tcolorbox` documentation for more information.

```
\begin{tcolorbox}[rightBox, title={Right 2
  {Box}}
  \lipsum[1][2]
\end{tcolorbox}
```

RIGHT BOX

Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis.

New:
2026-08-24

`/tcb/calloutBox=<text>`

The `tcolorbox` key containing the styling for callout boxes. This box will match the current color scheme. See the `tcolorbox` documentation for more information.

```
\begin{tcolorbox}[calloutBox, 2
  {title={Callout Box}}
  \lipsum[1][3]
\end{tcolorbox}
```

CALLOUT BOX

Curabitur dictum gravida mauris.

U: 2026-08-11

`\begin{statBox}{<heading 1>}{<content 1>}{<heading 2>}{<content 2>}`
`<environment content>`
`\end{statBox}`

This is a series of custom boxes that will stay the same height regardless of content length. They are always of equal width. You can use each half of `statBox` separately by using the `leftBox` and `rightBox` style keys. These follow the same documentation as `/tcb/featureBox`.

```
\statBox{Stat One}{
  10
}%
{Stat Two}{
  20
}
```

STAT ONE
10

STAT TWO
20

TABLES

Tables can be created using `plotable`. This uses `nicematrix` under the hood. See the `nicematrix` documentation for more information.

New:
2026-08-12

`\begin{plotable}{<column spec>}[<options>]`
`<environment content>`
`\end{plotable}`

This is a custom `NiceTabular` environment. It simply a wrapper that defines the styling for the table.

```
\begin{plotable}{c|l}
  Level & Feature \\
  1 & Cool abilities \\
  2 & Even cooler abilities \\
  3 & The coolest abilities \\
\end{plotable}
```

Level	Feature
1	Cool abilities
2	Even cooler abilities
3	The coolest abilities

New:
2026-08-13

`\lowercaption{<caption text>}`

This command formats a caption to sit below a table. It sets the text to uppercase and uses the `csdim` color.

CHARACTER SHEETS

Character sheets can be made using the `\MakeCharacterSheet` command which is provided by `plotweaver-character-sheet.sty`. To use this command, pass `character-sheet` into the document class options. This command takes in a series of key-value pairs and generates the sheet and any derived statistics. See `character-sheet.tex` for an example sheet.

New: 2026-08-16	\MakeCharacterSheet{<text>}	
	Generates a page character sheet. Each value is set by a key-value pair that is passed into the command.	
New: 2026-08-16	/charsheet/name=<text>	(name of the character)
	/charsheet/ancestry=<text>	(ancestry or lineage)
	/charsheet/level=<text>	(level)
	/charsheet/paths=<text>	(paths or talent trees)
	/charsheet/maxHealth=<text>	(maximum health)
	/charsheet/maxEssence=<text>	(maximum essence or investiture)
	/charsheet/recoveryDie=<text>	(the die used for recovery rolls)
	/charsheet/liftingCapacity=<text>	(lifting capacity)
	/charsheet/movement=<text>	(movement speed)
	/charsheet/sensesRange=<text>	(senses range)
	/charsheet/strength=<text>	(strength attribute)
	/charsheet/speed=<text>	(speed attribute)
	/charsheet/intellect=<text>	(intellect attribute)
	/charsheet/willpower=<text>	(willpower attribute)
	/charsheet/awareness=<text>	(awareness attribute)
	/charsheet/presence=<text>	(presence attribute)
	/charsheet/phyDefenseBonus=<text>	(physical defense bonus)
	/charsheet/cogDefenseBonus=<text>	(cognitive defense bonus)
	/charsheet/spiDefenseBonus=<text>	(spiritual defense bonus)
	/charsheet/agility=<text>	(ranks in agility)
	/charsheet/athletics=<text>	(ranks in athletics)
	/charsheet/heavyweaponry=<text>	(ranks in heavy weaponry)
	/charsheet/lightweaponry=<text>	(ranks in light weaponry)
	/charsheet/stealth=<text>	(ranks in stealth)
	/charsheet/finesse=<text>	(ranks in finesse)
	/charsheet/crafting=<text>	(ranks in crafting)
	/charsheet/deduction=<text>	(ranks in deduction)
	/charsheet/discipline=<text>	(ranks in discipline)
	/charsheet/intimidation=<text>	(ranks in intimidation)
	/charsheet/knowledge=<text>	(ranks in knowledge)
	/charsheet/medicine=<text>	(ranks in medicine)
	/charsheet/deception=<text>	(ranks in deception)
	/charsheet/insight=<text>	(ranks in insight)
	/charsheet/leadership=<text>	(ranks in leadership)
	/charsheet/perception=<text>	(ranks in perception)
	/charsheet/persuasion=<text>	(ranks in persuasion)
	/charsheet/survival=<text>	(ranks in survival)
	/charsheet/phyStatName=<text>	(optional physical stat name)
	/charsheet/phyStatRanks=<text>	(optional physical stat ranks)
	/charsheet/cogStatName=<text>	(optional cognitive stat name)
	/charsheet/phyStatBase=<text>	(optional physical stat base)
	/charsheet/cogStatRanks=<text>	(optional cognitive stat ranks)
	/charsheet/cogStatBase=<text>	(optional cognitive stat base)
	/charsheet/spiStatName=<text>	(optional spiritual stat name)
	/charsheet/spiStatRanks=<text>	(optional spiritual stat ranks)

<code>/charsheet/spiStatBase=<text></code>	(optional spiritual stat base)
<code>/charsheet/expertises=<text></code>	(content for expertises box)
<code>/charsheet/firstTalents=<text></code>	(content for talents on the first page)
<code>/charsheet/secondTalents=<text></code>	(content for talents on the second page)
<code>/charsheet/thirdTalents=<text></code>	(content for talents on the third page)
<code>/charsheet/weapons=<text></code>	(content for weapons box)
<code>/charsheet/armor=<text></code>	(content for armor box)
<code>/charsheet/inventory=<text></code>	(content for inventory box)
<code>/charsheet/currency=<text></code>	(content for currency box)
<code>/charsheet/conditions=<text></code>	(content for conditions and injuries box)
<code>/charsheet/purpose=<text></code>	(content for purpose box)
<code>/charsheet/image=<text></code>	(path to character image)
<code>/charsheet/description=<text></code>	(content for description box)
<code>/charsheet/backstory=<text></code>	(content for backstory box)
<code>/charsheet/obstacle=<text></code>	(content for obstacle box)
<code>/charsheet/goals=<text></code>	(content for goals box)
<code>/charsheet/connections=<text></code>	(content for connections box)
<code>/charsheet/rewards=<text></code>	(content for rewards box)
<code>/charsheet/notes=<text></code>	(content for notes box)
<code>/charsheet/hideBlanks=true false</code>	(hide blank boxes on the character sheet)
<code>/charsheet/stormlight=true false</code>	(use Stormlight Archive terminology)
<code>/charsheet/mistborn=true false</code>	(use Mistborn terminology)
<code>/charsheet/handwritten=true false</code>	(use a handwritten font for the character sheet)

The keys used for making a character sheet. These are all initialized as empty, other than the boolean switches. Other attributes, like physical defense, are derived from the provided key-value pairs.

COLOR SCHEMES

New:
2026-08-12

This document class currently provides three predefined color schemes: `stormlight`, `mistborn`, and `ariandor`. The default is `ariandor`. The color scheme is selected by passing its name into the document class options. Additionally, custom color schemes can be defined by overriding the following color definitions with `\colorlet`:

- `cspapercolor`: The background color of the page.
- `cstextcolor`: The color of the text.
- `cscolor`: The main color used for headings, borders, etc.
- `csaccent`: The accent color used for underlines, borders, etc.
- `csdim`: Dimmed color used for notes and other subtle text.
- `cstblheaderbg`: The background color of table headers.
- `cstblheadertext`: The text color of table headers.
- `cstblrowa`: Lighter background color for table rows.
- `cstblrowb`: Darker background color for table rows.

- `cscalloutheaderbg`: The background color of callout headers.
- `cscalloutheadertext`: The text color of callout headers.
- `cscalloutbg`: The background color of callouts.
