

PLOTWEAVER L^AT_EX DOCUMENT CLASS

Documentation for the Plotweaver L^AT_EX document class. See `example.tex` for sample usage. More documentation to come.

ICON COMMANDS

These commands produce commonly used icons. All of the icons are implemented using TikZ. The icons created by `\action`, `\doubleAction`, `\tripleAction`, `\freeAction`, `\reaction`, `\forever`, and `\key` will match the current text color. For example: ▶ ▶ ▶. Icons will also respect font size: ▶ ▶ ▶.

U: 2026-08-11	<code>\action</code>	(▶)
---------------	----------------------	-------

This command produces the ▶ icon.

U: 2026-08-11	<code>\doubleAction</code>	(▶▶)
---------------	----------------------------	--------

This command produces the ▶▶ icon.

U: 2026-08-11	<code>\tripleAction</code>	(▶▶▶)
---------------	----------------------------	---------

This command produces the ▶▶▶ icon.

U: 2026-08-11	<code>\freeAction</code>	(▷)
---------------	--------------------------	-------

This command produces the ▷ icon.

<code>\reaction</code>	(↩)
------------------------	-------

This command produces the ↩ icon.

<code>\forever</code>	(∞)
-----------------------	-------

This command produces the ∞ icon.

U: 2026-08-11	<code>\complication</code> [⟨value⟩]	(✨)
---------------	---	-------

This command produces the ✨ icon. It takes an optional argument for a number, which will be subsequently displayed.

A `\complication` is complicated. Sometimes complications come with values like `\complication[X]`.

A ✨ is complicated. Sometimes complications come with values like ✨X.

U: 2026-08-11	<code>\complicationDice</code> [⟨value⟩]	(✨)
---------------	---	-------

This command produces the ✨ icon. It takes an optional argument for a number, which will be displayed inside of the icon like so: ✨. It is a little larger than `\complication`.

```
A \complicationDice is complicated. Sometimes complications come with values like 2
\complicationDice[x].
```

A ✨ is complicated. Sometimes complications come with values like ✨.

\opportunity

(✨)

This command produces the ✨ icon.

U: 2026-08-11

\key

(★)

This command produces the ★ icon.

FEATURE BOXES

```
\begin{featureBox}[\textit{options}]
  \textit{environment content}
\end{featureBox}
```

This is a custom tcolorbox and works as such. Under the hood, it is defined by `\newtcolorbox`. See the tcolorbox documentation for more information.

```
\begin{featureBox}{Feature}
  \lipsum[1][1-3]
\end{featureBox}
```

FEATURE

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris.

U: 2026-08-11

```
\begin{statBox}{\textit{heading 1}}{\textit{content 1}}{\textit{heading 2}}{\textit{content 2}}
  \textit{environment content}
\end{statBox}
```

This is a series of custom boxes that will stay the same height regardless of content length. They are always of equal width. You can use each half of `\statBox` separately by using `\leftBox` and `\rightBox`. These follow the same documentation as `\featureBox`.

```
\statBox{Stat One}{
  10
}%
\statBox{Stat Two}{
  20
}
```

STAT ONE

10

STAT TWO

20
