

PLOTWEAVER L^AT_EX DOCUMENT CLASS

Documentation for the Plotweaver L^AT_EX document class. See `example.tex` for sample usage. More documentation to come.

ICON COMMANDS

These commands produce commonly used icons. All of the icons are implemented using TikZ. The icons created by `\action`, `\doubleAction`, `\tripleAction`, `\freeAction`, `\reaction`, `\forever`, and `\key` will match the current text color. For example: ▶ ▶ ▶. Icons will also respect font size: ▶ ▶ ▶.

U: 2026-08-11

`\action` (▶)

This command produces the ▶ icon.

U: 2026-08-11

`\doubleAction` (▶▶)

This command produces the ▶▶ icon.

U: 2026-08-11

`\tripleAction` (▶▶▶)

This command produces the ▶▶▶ icon.

U: 2026-08-11

`\freeAction` (▷)

This command produces the ▷ icon.

`\reaction` (↩)

This command produces the ↩ icon.

`\forever` (∞)

This command produces the ∞ icon.

`\complication`[*value*] (⚡)

This command produces the ⚡ icon. It takes an optional argument for a number, which will be subsequently displayed.

A `\complication` is complicated. Sometimes complications come with values like `\complication[X]`.

A ⚡ is complicated. Sometimes complications come with values like ⚡X.

U: 2026-08-11

`\complicationDice`[*value*] (⚡)

This command produces the ⚡ icon. It takes an optional argument for a number, which will be displayed inside of the icon like so: ⚡. It is a little larger than `\complication`.

A `\complicationDice` is complicated. Sometimes complications come with values like `\complicationDice[x]`.

A ✨ is complicated. Sometimes complications come with values like ✨.

`\opportunity` (✨)

This command produces the ✨ icon.

U: 2026-08-11

`\key` (★)

This command produces the ★ icon.

FEATURE BOXES

```
\begin{featureBox}[\textit{options}]
  \textit{environment content}
\end{featureBox}
```

This is a custom `tcolorbox` and works as such. Under the hood, it is defined by `\newtcolorbox`. See the `tcolorbox` documentation for more information.

```
\begin{featureBox}{Feature}
  \lipsum[1][1-3]
\end{featureBox}
```

FEATURE

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris.

U: 2026-08-11

```
\begin{statBox}{\textit{heading 1}}{\textit{content 1}}{\textit{heading 2}}{\textit{content 2}}
  \textit{environment content}
\end{statBox}
```

This is a series of custom boxes that will stay the same height regardless of content length. They are always of equal width. You can use each half of `\statBox` separately by using `\leftBox` and `\rightBox`. These follow the same documentation as `\featureBox`.

```
\statBox{Stat One}{
  10
}%
{Stat Two}{
  20
}
```

STAT ONE

10

STAT TWO

20
